1. Claims 1-5 are presented for examination.
2. The abstract of the disclosure is objected to because of the means language.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Correction is required. See MPEP § 608.01(b).

3. Claims 1-5 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are indefinite because of the following:

- a) "said stored data blocks" in claim 1, line 4 lacks clear antecedent basis. Prior to this, claim language recites a means for storing a "first representation". Obviously, first representation is different from storing data block. Also, this language never states that a data block was stored in order to claim later as "stored data blocks";
- b) "said diary records" in claim 1, line 6 lacks clear antecedent basis because prior to this on a single diary record is mentioned; and

Art Unit: 2142

c) claim 1 also uses the phrase "relating to..." or "message relates" but the meaning of the relationship is not clear.

4. Claims 1-5 would be allowable over the cited prior art when the 112 second paragraph problems are resolved.
